As of 1 September 2010 Medical Physics International, both in the UK and in Ireland, became part of the Olympus KeyMed Group (OKG). This was a result of OKG purchasing all the shares of Medical Physics (Holdings) Ltd, consisting of Medical Physics International Ltd (MPI) and Biomedical Equipment Services Ltd (BES).

The acquisition of MPI and BES, will enhance the operations and service provision for our collective customers. It is intended that MPI and BES will remain independent companies within OKG.

The telephone numbers and the contact details you have been using for all companies will remain the same. Contracts, quotations and all terms and conditions will remain the same and our pricing structure will be unaffected by this change.

As you can imagine the diversity and opportunities that we can now deliver to our customers has been greatly enhanced and we would welcome an opportunity in the near future to discuss the benefits that this acquisition can bring to you.

Yours sincerely
